2. Formal drawings are required to replace the informal drawings submitted by applicant on 4/18/2001.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The present application relates to a network processing device and method for updating network addresses, including the unique steps of: "a packet processing circuitry ... to receive an address reply to the address request; and the packet processing circuitry adapted to multicast the address reply to multiple ones of the processors at the same time."

The closest prior art, Rao (US Patent 6,789,118), discloses a packet processing circuitry that comprises a Forwarding Module FM to perform the necessary IP packet forwarding and route processing intelligence and searches the ARP table for the destination address of an IP packet by sending out a request for the destination address and receiving an address reply to the address request at the originating FM so that the ARP table is updated with the destination address information. However, Rao fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Art Unit: 2664

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
